Disaster Damage:

DREF - Anticipated Unmet Needs The State of Missouri received more than 230 applications for funding in excess of \$250,000,000 for our PL-110-329 appropriation. This is nearly two and one half times the state's awarded grant amount. To date we have awarded 55,230,947 that are detailed in DRGR, with another \$25,071,500 committed and in process of executed grants. There are applications currently in our review and development process that will exceed the remaining Supplemental Appropriation and will be awarded based on competitive scoring. Missouri is proposing to dedicate \$5M of funding to access a dollar for dollar match of \$5M more in DREF funds. The funds will be offered using a request for proposals or notice of fund availability method of distribution. Applicants will be evaluated on need, impact, and local effort. The State of Missouri has a significant amount of land mass residing in the 100 year and 500 year floodplain, as defined by the Federal Emergency Management Agency FIRM maps. Historically, the state developed using the river network (Missouri River and Mississippi River and their tributaries) as a transportation network to ship goods to the west. As such, communities developed and grew along those rivers and tributaries. That growth has contributed to flooding events that impact the health, safety and well-being of Missourian's. Loss of life and loss of homes, businesses, personal property and the devastation to real property has burdened the state during significant, widespread flooding events. Between 1990 and 2009, Missouri recorded more than 90 deaths due to flash and riverine flooding. Proof of that widespread damaging capacity came in the form of a Presidential disaster declaration for 106 of the 114 total counties in the State in 2008. Missouri is home to 977 cities, towns and villages in those 114 counties. Since the floods of 1993, Missouri has created and implemented an aggressive buyout of properties in the floodplain and we have realized substantial savings as a result. More than 1000 properties have been purchased and deed restricted in perpetuity to open space activities in the last decade and one half. Those properties will never again receive a National Flood Insurance Program payment. They will never subject a resident to danger or experience damage to a structure. The program can be called a success. However, FEMA estimates that more than 216,000 households are within designated floodplains in Missouri. To date, in the short period between the notice of available DREF funding, we have identified 5 more communities that are prepared to support more buyout activities. There are more eligible properties, more willing communities, and more families deserving of a decent, safe and sanitary comparable home, outside of the floodplain. Many of these communities will use CDBG funds to match FEMA Hazard Mitigation funding but there are additional, smaller river communities that are not eligible for FEMA funds, that our efforts could support, as well. Even with the buyout activities, Missouri's communities will always be linked to the rivers. Their future, their viability and in many cases their economic activity is still linked to the waterways. It is so, that access to funding and use of local resources for activities. We have regional planning commissions, c

councils of government, and federally designated economic development districts. Those service providers assist with economic development strategic planning, redevelopment planning and planning related to specific projects. There is however, a gap in a community's access to real land use planning. Some mitigation efforts in Missouri have been driven by need as a response to an event. Land use planning will give many communities an opportunity to address that next step of

Amendment #2 to second Disaster Supplemental Action Plan  
Unmet Need from 2008  
Already reeling from multiple weather related events in 2008, the region had suffered previous loss of homes and businesses through tornados and flooding from which they had not recovered. Multiple Presidential disaster declarations were made as a result of the repeated damaging weather in 2008. In addition, 2010-2011 Tornado events have exacerbated needs in some areas. The state is proposing to allocate \$27,000,000 to allow communities affected by tornadoes in 2010 and 2011 to access 2008 Disaster Supplemental funds to address housing and economic revitalization needs that were exacerbated by the 2010/2011 events, or otherwise meet unmet needs from 2008. While specific detailed grantee activities are still being determined, housing and business lending and demolition activities are expected to comprise all of the reserved amount. Initial estimate of business lending is being allocated at \$3,000,000. The \$3,000,000 is set up as a project in the action plan, and the remaining \$24,000,000 is set up as a project until specificic housing and other activities are identified.
